Note that these are the raw scores out of 10 for each sub-criteria, which are then weighted to produce the criteria scores and final overall score (see Results Explainer)

NOTES

- New retailer operating less than 12 months. Likely that scores will improve as retailer establishes itself in the market and develops green offerings.
- "Pure" retailer with no generation assets.

METHODOLOGY COMMENTS

- GloBird does not own generation assets, and is therefore assigned average intensity of NEM.
- Glo Bird stated that its position on the RET was to maintain the 20% target, but did not specify if this was maintain the original GWh target, or maintain "real" 20% and recalibrate GWh target. Have assumed "maintain GWh".
- Glo Bird does not produce formal reports (such as Annual Reports/Sustainability reports) and therefore was not scored on type of sustainability reports.

KEY POINTS

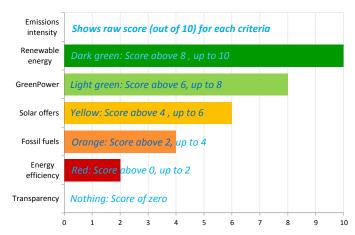

The section below presents the retailer's datapoint for each sub-criteria, and the raw score out of 10 received for that sub-criteria. Weightings are then applied to each sub-criteria in order to calculate each criteria score. The criteria scores are then weighted again to produce the overall score. See Methodology for details of weightings.
